

**INGREDIENTS per dosage 20g**

Yeast culture	15000 IE
	3000 IE
Added	38 mg
Vitamin A	20 mg
Vitamin D	20 mg
Vitamin E	20 mg
Vitamin B1	10 mg
Vitamin B2	25 mg
Vitamin B6	1000 mcg
Vitamin B12	15 mg
Nikotinsyra	15 mg
Pantothensyra	500 mg
Koppar (kopparsulfat)	25 mg
Magnesium	200 mcg
Manganese	250 mcg
Selenium	50 mg
Cobalt	500 mcg
Zinc (Zinksulfat)	50 mg
Iodine (kalciumjodat)	3 g
Iron	1,5 g
Sodium	1,5 g
Sulfur	
Phosphorus	
Biotin	

DURABILITY

24 month. See best before date

STORAGE

Store in a dry, cool and well sealed.

Harmoni

Improves the horse's nutrient absorption and immune function

Yeast nutritional supplement of the *Saccharomyces cerevisiae* species that has been treated to access the functional substances, nutrients and essential trace minerals. The yeast encourages the development of beneficial microorganisms and balances the pH in the stomach and intestines. This leads to better digested food, which in turn gives better nutrient uptake of coarse and concentrate fodder.

A healthy diet is essential for a harmonious and healthy horse. Complete vitamin and mineral supplements, combined with the yeast culture and the improved intestinal flora, boosts the general condition of the horse.

Horses in training and competition are subjected to constant environmental change and stressful experiences that affect bowel function by changing the intestinal flora, thus causing poorer nutrient uptake. VIMITAL Harmony stabilises the intestinal flora of environmental changes, stress, change of feed and cold.

New locations, even when competing or training, can affect the horse in the same way as when we go on holiday. Sensitive and nervous horses are more affected and you should especially consider internal stress, which can often be worse than the acting out of nervousness. Poor absorption of nutrients is often found in the general condition and can be a sign of impaired immune function.

Usage

Horses in training and competition are subjected to constant environmental changes and stressful experiences that affect bowel function by changing the intestinal flora and thus poorer nutrient uptake. VIMITAL Harmony stabilizes the intestinal flora of environmental changes, stress, change of feed and cold.

A change of environment is not just a change of stables or owners. New locations such as meeting or training can affect the horse in the same way as when we go on vacation. Sensitive and nervous horses affected more and then you should especially consider internal stress which can often be worse than the acting out nervousness.

Feed Change is not just a change of coarse or concentrates, but just as much reduced turnout in the fall, less fresh grass, etc.

TIP! Be very careful about placing the horse on frozen grass. It is a very common cause of intestinal disorders, diarrhoea and colic.

Poor absorption of nutrients is often found in the general condition and can be a sign of impaired immune function. Many horses with eczema, rashes and poor coat have been able to eliminate the problems by balancing the gut with VIMITAL Harmony.

Also recommended for breeding mare as it keeps both mare and foal healthier.
