## Vitamin E

For the horse's muscle function and blood circulation

Vitamin E is very important for muscle function and affect the performance and endurance as well as contribute to the horse's well being. Vitamin E also increases the blood supply in the muscles. Lack of vitamin E occurs more easily when cold, feed changes and pregnancy.

Easy to administer and dispense.

### Usage

For the horse's muscle function, performance, endurance and well-being. Increases blood supply to the muscles. Is also given to during pregnancy.
