

#### ICONTENT per dosage (20g)

Vitamin E	500	mg
Selenium (selenmethionin)	2,2	mg
Manganese (chelated)	10	mg
Zinc (chelated)	10	mg
Lysine	1000	mg
Methionine	1000	mg

#### DURABILITY

24 month. See best before date

#### STORAGE

Store in a dry, cool and well sealed.

## E-Plus

with amino acids and selenium

Complete vitamin E supplement with selenium that the body needs to metabolize E-vitamin. Contains lysine and methionine, essential amino acids for building and repairing muscle, bone and soft tissues. Selenium, zinc and manganese are trace elements required in nutrient metabolism and muscle building.

Deficiency occurs easily in a cold environment, during feed changes and pregnancy. Affects performance and endurance, and contributes to horse welfare. Vitamin E also affects the blood supply to the muscles by playing a vital part in the rehabilitation of the blood vessels.

Silage is usually poorer in vitamin E as the acids in the fermentation process break down the vitamin.

### Usage

Vitamin E is very important to the horse's muscle function. Deficiency occurs easily when cold, feed changes and pregnancy. Affect performance and endurance and contributes to horse welfare. Vitamin E also affects the blood supply to the muscles by being an important part of the rehabilitation of the blood vessels.

Ensiled hay is usually poorer in vitamin E as the acids in the fermentation process breaks down the vitamin
