

**INGREDIENTS:**

Glucosamine Sulphate - KCL	7,5 g
- pure glukosamine	20 g
MSM (kelaterad)	3,75 g
chondroitin sulfate	25 mg
Dextrose	
Manganese	

DURABILITY

24 month. See best before date

STORAGE

Store in a cool dry place.

Joint Rebuild

Joint supplement with Glucosamine + Chondroitin + MSM

Vital Joint Rebuild is a well-balanced quality supplement with the main building blocks for the rehabilitation of stiff joints. Experiments on horses have shown good results with improved mobility.

Glucosamine helps to restore articular cartilage and is well known for its positive effects on horses with worn out joints.

Glucosamine is easily absorbed in the digestive tract when present as glucosamine sulphate. It adds sulphur which is needed in the cartilage structure.

Chondroitin sulphate reinforces the glucosamine effect and helps to prevent the degradation of cartilage damage.

MSM assists in cell-building in the whole body by improving the cell's ability to exchange nutrients, oxygen and waste products with the blood.

Vital Joint Rebuild is given as a treatment for 14-28 days.

Usage

Recommended for younger horses after tougher competition and training periods and for older horses with incipient joint stiffness because they produce less endogenous substances.

VITAL Joint Rebuild is usually given as an extra boost during a "treatment" period of 2-4 weeks, depending on the horse's age and status.

We recommend that you also begin daily supplement of VITAL Hyaluron100. When Joint Rebuild is finished (after 14 or 28 days), continue with only Hyaluron to support synovial fluid to lubricate the joints and reduce wear.

If the older horse exhibits increased stiffness after treatment period, 1/3 dose of Joint Rebuild is given as daily addition. Consisting lameness should always be examined by a veterinarian!

Remember that the best protection for your joints are well-trained and agile muscles! Check MSM availability in your diet. Read more in VITAL MSM.
