

**INGREDIENTS per dose:**

Tryptophan	3000 mg
Thiamine (B1)	500 mg
Magnesium	3000 mg
Yeast Culture	6000 mg

Wheat feed flour

DURABILITY

24 month. See best before date

STORAGE

Store in a dark, cool and well sealed.

Fokus

For a calm and more focused horse

VITAL Fokus is a feed additive with the substances horses need to manage stress and maintain concentration, eg for learning, training, competition or transportation.

Contains the proven nerve stabilizing ingredients Thiamine (B1), Tryptophan and Magnesium. Addition of Yeast Culture stimulates intestinal microflora and improves the absorption of nutrients.

Stressful situations release substances that trigger the horse's immediate reaction. It is an innate reflex to protect the horse and responds quickly without evaluating the situation. The triggering substances must then be neutralized by other substances in the body. Thiamine, Tryptophan and Magnesium are all part of the stabilization process. Has the horse shortage of these "countermeasures", it has no possibility to balance their reaction and becomes difficult to manage or will lose focus.

VITAL Fokus supplement the lack of natural nutrients found in many horses with symptoms of stress or bad temper.

Usage

Given to horses who overreact to stressful situations, find it difficult to let off steam or revving up mentally for training, competition or unfamiliar situations.
