

**INGREDIENTS per 1000ml**

Biotin
Feed Molasses

15 mg

DURABILITY

24 month. See best before date

STORAGE

Store in a dark, cool and well sealed.

Biotin Liq

High concentrate flavoured with molasses

Biotin in a high concentrate flavoured with molasses to improve palatability. The liquid is convenient to handle.

Biotin is necessary for cell growth, production of fatty acids and metabolism of fat and amino acids. It is also involved in the citric acid cycle and to maintain a constant blood sugar level.

Deficiency can cause fatigue, skin problems and poor appetite.

High doses of biotin have shown improvements, including in the quality and growth of hoofs.

Usage

Biotin (Vitamin H) improves hoof growth and hoof quality. It is also a prerequisite for the horse to assimilate protein in feed. Increases hoof elasticity and reduces wall cracks.

Sufficient Biotin is an essential quality in the horse's hoof growth. Also contributes to a better coat.
