DURABILITY

24 month. See best before date.

For external use only.
Reseal after use.

Cooling Gel

Reduces recovery time after hard training

Cooling gel minimises bleeding from small ruptures in muscles after hard training and injury. Massaged or rubbed onto the affected area. Widely used in elite sport, general exercising and by physiotherapists, masseurs and for daily care of horse legs and after strenuous sessions.

Reduces recovery time.

Always applied on uninjured skin.

Usage

RADITAL cooling gel is intended for daily care after hard training and only for reducing minor bleeding in the outer tissues.

Cooling gel are well tested with good results for the care of the horse's legs.

Massage into the desired area directly adjacent to the hard work or damage.

Should only be applied to intact skin.
