

INGREDIENTS

Water
Ethanol
Icaridin® 20 %
Lavandin oil
Polyethylen glycol
Dimethyl-dimethylhydantoine

Chemicals Agency Authorisation: 4922
Eligibility Class: 3
Keep out of reach of children.
Includes no doping-related topics.
Treated animals have 60 days of food conversion.

RENONS Mosquito & Tick should be handled safely.
Follow the instructions on the packaging and in the product data sheet.

Caution
Wash hands after application. Do not use on broken skin. Avoid contact with lips and eyes. Do not use on children's hands and avoid children coming in contact with treated animals, as children can lick your hands or put them in their mouth. Case of contact with eyes, rinse immediately with water for a minute.
If swallowed - seek medical advice.

Mosquito & ticks

with day effect for animals and humans

Mosquito & Tick has the same formula as RENONS antily solution, but 20% (4x) Icaridin. The high concentrate provides effective day long protection against ticks and the most aggressive biting insects. Can be used on both horse and rider.

Colourless with anti-dehydration agent. Gentle on equipment.

Contains Icaridin, the most tested substance against insects and recommended by the World Health Organisation (WHO) and others in malaria-infected regions. Has very low toxicity and low environmental impact.

Usage

HUMAN - for long-lasting protection against insects, up to 11 hours against mosquitoes and 5 hours against biting flies and gnats, and up to 14 hours for ticks. Spray evenly and thin over exposed small areas of skin.

Use max. 3 times / day for adults and max. 2 times / day for children, and only for a limited period of time. Do not use on children under 3 years.

HORSE - For daily use. Protects up to 24 hours against flies and up to 14 hours against ticks. Spray thin and evenly over the horse (about 10 strokes) of about 2 dm away with the nozzle facing the horse's head. Spray a sponge or hands and hair on the head and neck. Used maximum 2 times / day and for a limited period of time. Use RENONS AntiFLy Creme next to the eyes and mucous membranes.
